Re: Guaranteed Delivery

In an innovative partnering arrangement, Nucor Building Systems and The Hollingsworth Companies have entered into an agreement to ensure quick delivery of the pre-approved standard building sizes The Hollingsworth Companies offer in their Industrial Building Program. Nucor Building Systems has committed to deliver the structural steel, ready for erection, ***in just 6 weeks from receipt of a final building order.*** The predetermined sizes of 86,400sf, 108,000sf and 129,600sf have been completely engineered and detailed for each SouthPoint Business Park location in Alabama, North Carolina, Tennessee and Virginia and are ready to drop into the production schedule immediately. This cuts a full six to ten weeks from the building order/design/delivery process typical within our industry. With Nucor Building Systems' relationship with our parent company, Nucor Corporation, financial stability and raw material availability have never been an issue. Not every steel building manufacturer can make that statement.

As one of Nucor Building Systems' valued and longstanding Authorized Builders, The Hollingsworth Companies have worked closely with us to fine tune the details in every aspect of the building package to ensure high quality and high value. As a result of mutual commitments by both our companies, the process is greatly streamlined. This allows us to cut delivery time of this proven product in half while maintaining a huge amount of flexibility to tailor the plans to the end-customer's needs. This is just one example of how The Hollingsworth Companies and Nucor Building Systems strive to maximize benefits for you, the end customer.

If we get an order today, steel will arrive in six weeks or less, guaranteed. No one else can deliver like The Hollingsworth Companies and Nucor Building Systems.

Sincerely,

Jeff Carmean, General Manager  
Nucor Building Systems  
Swansea, SC
