Dear Brian,

ALABAMA

This proposal is in response to your RFQ for TL-175. We have started construction on this 16.6 acre site to build a 195,360 square foot virtually complete industrial building. Upon execution of a Lease, we can complete the facility to include upfits with offices and bathrooms to your specifications.

GEORGIA

To support your operation, we have provided upfits for the Offices and provided a matching HVAC system for warehouse cooling. These items are included as a part of the upfits. Unlike the original lease, because we have just been to market for very similar upfits, we are willing to guarantee the cost of these improvements if we can get a quick decision from Hanon to move forward. Hanon Systems can adjust the scope to just those items they most value in the upfits of the facility using the same formula used in the original lease.
